

# TBF/2517 300V LF

## Electronic equipment cable

Heat resistance	★★★★★
Oil resistance	★★★★★
Noise resistance	★
Flame resistance	★★★★
Torsion resistance	★★★
Flexibility resistance	★★★★ *1
Cable carrier	★★★★

\*1 More than 10 cores is [3].  
\*The characteristic is an aim.

&gt;&gt;&gt; Meeting standard

Certification	UL AWM	cUL AWM	Electrical Appliance and Material Safety
Applicable standard	UL 758	CSA C22.2 No.210	LawDepartmental order to determine a technical standard of the electrical equipment
Official symbol	UL STYLE 2517	CSA AWM II A/B	ASEISMATIC HVCTF
Voltage rating	300V	300V	300V
Temperature rating	105°C	105°C	75°C
Conductor	UL 758	CSA C22.2 No.210	JIS C 3102,JIS C 3152
Flame rating	VW-1	FT1	JIS C 3005 4.26.2 b)

### > Application

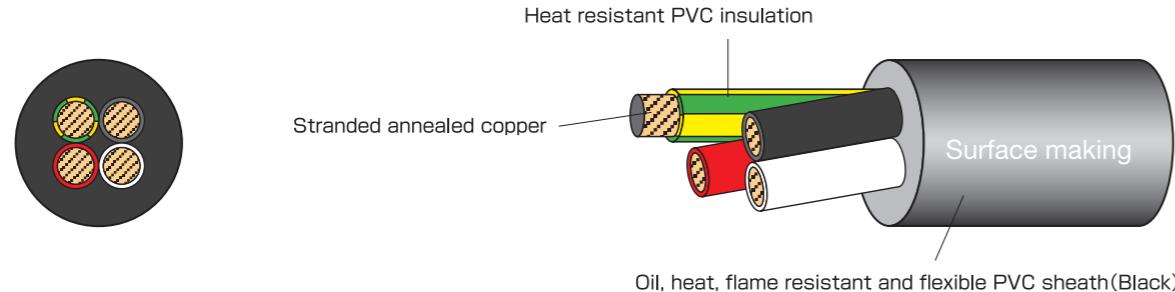

- It is possible to use it for wiring medium or low-speed operational components of machine tool.
- Cable Bear test 5 million times or more. (or more ability 10 million times)
- Vibration resistant cable with UL and cUL at 300V,105°C. (Category : AVL V2, AVL V8)
- Fit to Electrical Appliance and Material Safety Law. (19~15AWG)

### > Feature

- Fine wire conductor use.
- Heat resistant PVC used for insulation.
- Oil and heat resistant PVC used for sheath.
- Flame resisting : UL VW-1, cUL FT1.

### > Construction figure

Multi core cable

※Cable with more than 10 cores : binder tape on cores.

\*3c or more has the [Y/G] earth cable of an equal size.

\*The test of 2000V/5 minute besides the withstand voltage test on above mentioned UL standard and the CSA standard is applied.

\*The size indicated within parenthesis in the above table, describes the appropriate size of Japanese domestic use.

### ► Allowable ampacity

The allowable ampacity in this catalog is a recommended value at one in the air construction and the ambient temperature 30°C and in the case of use for Japanese equipment in the wiring.

Allowable ampacity is calculated based on JCS0168.

Please multiply the following adjustment factors by the ambient temperature.

Please select the allowable ampacity value to much of usage.

#### ● Adjustment factors(at ambient temperature)

Ambient temperature(°C)	30	40	50	60	70	80	90	100
Adjustment factors	1.00	0.93	0.86	0.77	0.68	0.58	0.45	0.26

### ► Movement characteristic

#### ● 2~8C

* )1 Bending	Bend	* )2 U-shaped turn-back	90° bending	Twist	* )3
			Straight	Bending	Move bending
A	B	B	B	C	D

Examination's time:  
S= More than 20 million times C= More than 3 million times  
A= More than 10 million times D= More than 1 million times  
B= More than 5 million times E= More than 0.5 million times

\* )1 It is C when overall diameter of the cable is 20mm or more, and D when overall diameter of the cable is 30mm or more.

\* )2 Our original test showed that no case of wire breakage could be detected for TBF even after 10 million cycles.

\* )3 When overall diameter of the cable is 20mm or less.

#### ● More than 10C

* )1 Bending	Bend	U-shaped turn-back	90° bending	Twist	* )3
			Straight	Bending	Move bending
B	B	B	C	C	E

The longevity of the cable inside a cable bearing is dependent on the travel distance.

Please consult our Sales Department when wiring a travel distance of 5m or greater.

### ► Oil resistance

Insulating oil	Lubricating oil	Cutting oil I	Cutting oil II	Hydraulic oil	Grease
<
